

Opmerking 1: This is a Work in Progress drawing: not Finished

Alterations / Additions

This drawing is only valid for execution when it has the "Ready for Execution" stamp with date and signature of the architect as well as approval from the mandatory Classification Society, Notified Body and/or other applicable authorities.

Before building/reconstruction the technical appliances, accessories, article codes and type numbers, as well as the total engineering of the system has to be checked by the builder for size, power/points and final functioning.

All measurements and dimensions have to be checked and finalized on the spot by the builder before production.

With this version revision all previous versions are no longer valid.

All our work and material is subject to the latest Regulations & Conditions of the Netherlands Society of Naval Architects (N.B.J.A.)

STATUS: For technical orientation for Client and Architect only
